(54) Title: A MARKUP LANGUAGE TRANSLATOR SYSTEM

(57) **Abstract:** A method of providing content to be presented on a terminal, said method comprising: taking as an input a first document in a first document language, the first document language using markup tags to define elements of the document, said first document language including a first set of element types, translating the first document into a second document in a second document language, the second document language using markup tags, text or document codings to define elements of the second document, said second document language including a second set of element types, wherein the first set of element types includes a first element type, for which an equivalent element type is not present in said second set, and wherein the first document includes a section including said first element type and at least one attribute of the element type, the method comprising processing said first section in the first document, and generating a corresponding second section in said second document, said second section including a second element type, wherein one of said first section and said second section includes two separate subsections which each include one or more attributes corresponding to one or more attributes of said second or said first element type, respectively.
